

Webinar: Learning Outcomes

Barnes Foundation

Thank you for attending our online webinar:

September 16, 2020

The Barnes Foundation: Case Study + Roundtable A Masterful Execution of Modern Stone Work

Here's a recap of what we covered:

- **A Landmark Project**—The Barnes Foundation was a true testament to stone architecture. This distinctive building owes its acclaim and many awards, in part, to the inspiring facade—and team—that defined it.
- **Moderated by Architect Tod Williams**—we were joined by ABC Stone for an insider's look into the inspiration and sourcing of stone, challenges, innovative solutions, and unending dedication that were necessary for which made this architectural feat possible.
- **Q&A**—We had a range of interesting questions asked by viewers—and from each other on the panel!
